

Increase valve life and compressor run-time! rMAX™ High-speed Valve

For Ariel®, White Superior®, Gemini®, Joy®, I-R®, Worthington®,
Knox Western®, Ajax®, Chicago Pneumatic®

OEM SUPERIOR™ PARTS & PRECISION REPAIR

Contoured valve seats

- **Better handling of entrained liquids**
- **Smoother, unrestricted gas flow**
- **Maximizes gas flow**
- **Better flow of dirty & wet gas**

Machined poppets & contoured poppet heads

- **Longer life, lower maintenance costs, less downtime**
- **Increases gas flow**

CECO Resilon-T® poppet material

- **Higher operating temps**
- **More durable**
- **Longer lasting**
- **Longer time between overhauls**

Field repairable, ease of assembly/disassembly

- **Lowers downtime**
- **Saves money**
- **Less repair labor, quicker turnaround**

One size poppet & spring

- **Simplifies parts inventory**
- **Spare parts readily available**

rMAX™ Maximum reliability for increased compressor life!

Since 1964 CECO has been supplying **OEM SuperiorSM** valves that improve compressor efficiency, run longer, and save your company money. The CECO rMAX™ high-speed valve is engineered to withstand harsh field operating conditions and increase run-time while still providing excellent performance, allowing the maximum flow through the valve. Contoured valve seats and specially-designed poppet heads minimize the liquid or debris entrapment that can cause early failure in disc and ported-plate valves.

Call us to learn more about how CECO rMAX™ valves can improve the efficiency of your high-speed field gathering compressors.
