

# STACK EMISSIONS TESTING

Stay in compliance

In CECO's state-of-the-art testing trailers, we can provide onsite results of criteria pollutants and HAPs using the latest technology, including FTIR analyzers. More advanced performance and diagnostic services can also be performed, as needed. We mobilize the highest quality technology and technical expertise to each job.

## ENGINE EXPERTS

Proven engine experts with years of experience perform emissions compliance testing to meet numerous EPA and state regulatory requirements. CECO's testing teams not only provide mandatory compliance testing, but also have the experience to help you resolve your toughest compliance issues.

## QUICK RESULTS

CECO knows that time is valuable when

providing compliance testing. Results are available onsite and reports are submitted in 5 days.

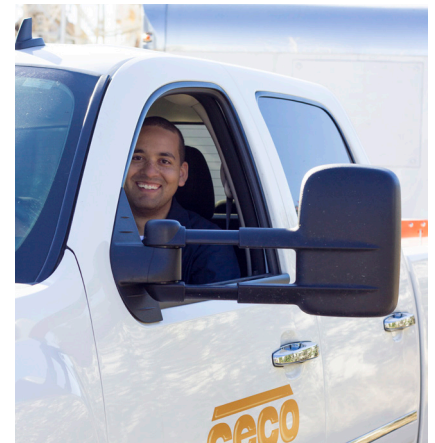

## ENGINEERED QUALITY

CECO has been delivering quality OEM Superior<sup>SM</sup> products and services to the gas transmission, gas processing, and petrochemical industries since 1964. CECO's Stack Emissions Testing Service continues to present CECO as the industry standard for emissions testing services.

## COMMONLY PERFORMED TESTS:

- Major & minor Source & Title V
- Gas Turbines: GG & Quad K
- Recip SI Engines: Quad J
- RICE: 63 - Quad Z MACT
- TCEQ: 106.512
- Test methods commonly used: 1, 1A, 2, 3A, 4, 7E, 10, 19, 20, 22, 25A, 320, ASTM D6348

- Emissions testing for NO<sub>x</sub>, CO, VOC and formaldehyde
- Capable of simultaneous emission testing on two engines or conducting pre & post catalyst efficiency measurements
- Engine combustion optimization testing and tuning
- Air/fuel ratio curve development
- Onsite results available for VOC and HAPs through FTIR
- Reports submitted within 5 days
