CECO durMAX™ pneumatic actuators and unloaders are custom-designed for trouble-free gas transmission compressor efficiency. Built to API specifications, CECO durMAX™ actuators provide safe, consistent automation for your compressor valve cap and head-end clearance pockets.

MAXIMUM DURABILITY
The CECO durMAX™ actuator’s carefully engineered design includes a balanced piston for smooth, durable operation - this feature allows the actuator to avoid breakage and other inherent problems common in finger-type deactivators. Additionally, a removable packing gland allows replacement of seals without disturbing the plunger.

A CUSTOMIZED INVESTMENT
CECO custom-designs durMAX™ actuators and unloaders to maximize gas transmission compressor efficiency. By removing hand wheels and outdated unloading devices, CECO can fit your

CECO durMAX™ actuators
are designed for maximum gas transmission compressor efficiency.

ENGINEERED QUALITY
CECO has been delivering high-quality products and services to the gas transmission, gas processing and petrochemical industries since 1964. The reliability and efficiency of our pneumatic actuators continues our industry leadership in maximizing compressor operation and cost-saving products and services.

Maximum Durability
- Balanced piston results in smooth, durable operation
- Avoids inherent operational problems and breakage of the finger-type deactivators

Removable Packing Gland
- Seals can be replaced without disturbing plunger

Fail-Safe Design
- Opens on loss of air pressure

API-Compliant Construction
- Double-seals and vents, preventing mingling of air from the operating cylinder and gas from the compressor cylinder

Interchangeable Parts
- Spare parts are readily available
