Summary

(8 training hours)

Crankshaft Web Deflections & WebMap2 Software Training

This course teaches the basis concepts of crankshaft web deflections readings and how to interpret those critical measurements.

Upon completion of the course, each student will understand the theory and purpose of web deflections; the steps and procedures required to take web deflections; and how to interpret web deflection data using the WebMap2 software.

Course topics include:

- Theory and purpose of web deflections
- Proper setup and data collection techniques of web deflection data (including the proper use of Indikon WDS)
- WebMap2.0 Software Training
- WebMap2 Web Deflection Interpretation
