

TRAINING &
TECHNICAL SERVICES

Overview

Multiple equations:

- *Determines efficiency, power, fuel flow, and capacity*
- *Calculates measurement and total uncertainties*
- *Features customizable graphical compressor map interface*
- *Includes online, real-time performance monitoring*
- *Features factory-to-field translations and test corrections*
- *Analyzes data related to the field test guidelines*

Field testing software

TurboPerform

For centrifugal compressors

Take the guesswork out of compressor performance!

CECO is proud to be the exclusive provider of **TurboPerform**, a new standardized field testing software for centrifugal compressors.

TurboPerform utilizes multiple equations of state and other standard models and methods to accurately determine performance and quantify uncertainty.

TurboPerform is sponsored by the Gas Machinery Council (GMRC) and was developed by Southwest Research Institute (SwRI)

The standard in performance testing!
